

G H O S T F E E D

The GhostFeed cable system supports and feeds the range of LOW VOLTAGE devices (Teres LV, Ludo, Ludo Linear), streamline the perception of the equipment's power system and enhancing the application context.

Maintaining unchanged the flexibility of a track, implements the application for indirect lighting and at the same time minimizes the installation impact in prestigious environments.

SPECIFICATIONS

- Multipole cable 2x1.5
- Tin-plated copper insulated in PVC with double freestanding steel rope with breaking load of 300Kg
